CAREER PROFILE

Frontend Engineer with 2+ years hands-on experience in developing web applications. Looking to obtain a Frontend Engineer position where I will work on B2B products utilizing my skills in UI design, debugging and performance control to help launch products faster and more efficiently. Proficient with CSS/SCSS, React, and TypeScript

WORK EXPERIENCE

JavaScript Engineer

Web Application Developer

 Jun 2019 – Present

My role is to

- Build complex products for the web and mobile platforms.
- Use HTML, CSS and JavaScript to replicate and create new Web Designs.
- Build product and delivery based ReactJS applications using 100% latest tools e.g Hooks and state management.
- Build a Portfolio Website using HTML, CSS and Vanilla JS increasing my online visibility by 95%.
- Build pixel perfect design while maintaining good code structure and performance.
- Giving attention to details in implementing a consistent UI for amazing user experience.
- Increase website code efficiency (reduction) of 5 projects by over 50% each.
